

Ohio Society of Addiction Medicine 2025 Annual Meeting Agenda

- 7:00 am** **Registration / Continental Breakfast / Visit Exhibits**
- 8:00 am** **Welcome** - *Krisanna Deppen, MD | OHSAM President*
Introductions & Moderator - *Neera Gupta, MD | Education Committee Chair*
- 8:20 am** **Treating Adolescents with Substance Use Disorders (SUDs)**
Mary Dooley, PhD and Will Goldman, DO
Objectives: Identify key developmental, psychological, and environmental factors that contribute to substance use in adolescents and how these inform assessment and treatment planning. Describe evidence-based treatment approaches for adolescent substance use disorders, including motivational interviewing, cognitive behavioral strategies, and family-based interventions.
- 9:00 am** **Drug Induced Movement Disorders**
Junaid Siddiqui, MD
Objectives: Identify different types of movement disorders. Describe some of the common movement disorder side effects of known drugs in psychiatry.
- 9:40 am** **Management of Stimulant Use Disorder**
Christine Collins, MD
Objectives: Define stimulant use disorder and associated medical and psychiatric comorbidities. Review ASAM/AAAP Clinical Practice Guidelines on the Management of Stimulant Use Disorder (Oct. 2023). Apply management strategies in clinical case scenarios.
- 10:20 am** **Break / Visit Exhibits and Posters**
- 10:50 am** **The Overdose Crisis Among People Experiencing Homelessness**
Avik Chatterjee, MD
Objectives: Describe unique harm reduction approaches that may help address overdose risk among people experiencing homelessness. Describe barriers to MOUD access among people experiencing homelessness and innovative approaches to increasing access in that population.
- 11:30 am** **Potential of Anti-Obesity Medications for Addiction/Substance Use Disorders**
Raman Krimpuri, MD
Objectives: Describe the pharmacologic mechanisms of anti-obesity medications (AOMs) that overlap with pathways implicated in substance use disorders. Examine the emerging evidence and generate curiosity about the role of AOMs as potential adjunctive treatments in addiction medicine.
- 12:10 pm** **Carceral Addiction Medicine: Perspectives from a Level One Prison**
Kate Berenson, MD

Objectives: Identify the unique challenges administering addiction care in a carceral environment. Know/Learn perspectives from enrolled inmates.

12:50 pm **Lunch / Visit Exhibits and Posters**

2:00 pm **Ketamine in Psychiatry: Promise, Peril, and the Path Forward**

Brian Barnett, MD

Objectives: Describe the current clinical evidence supporting ketamine's use in psychiatric disorders and substance use disorders. Identify key risks associated with ketamine use in psychiatric practice and potential interventions to improve safety.

2:45 pm **Yes, And...Advocate! Using Medical Improv to Build Effective Advocacy Skills in Addiction Medicine**

Carolyn Chan, MD and Lindsay Perusek, DO

3:30 pm **Poster Awards and Presentation**

5 min each for top 3 awardees

4:00 pm **Adjourn**
